MINERAL COMPOUNDS

MAGNESIA – Your specialist for competent support in Quality affairs

Requirements both from official regulation and customers increase continuously. The multidisciplinary, well trained personnel of our quality unit serves you with documentation and some application technology expertise.

Onto your requirements, we are well prepared. Commonly required documentation for our pharmaceutical products is readily available. If more distinct information is needed, we request them from our suppliers short dated.

In case you need special analysis we have qualified laboratories on hand to serve you with the required values. Magnesia is GDP-certified and complies with EU requirements for distribution of APIs for human medicinal products.

If you would like to check out our capabilities personally, you are invited to audit us.
