

MAGNESIA – Your specialist for Magnesium oxide

MAGNESIA

MINERAL COMPOUNDS

Are you looking for a Magnesium source in a prescription medication or other pharmaceutical use? We offer a wide range of Magnesium oxides originating from natural resources, e.g. sea water or Magnesium ore. Reliable sources are the Dead Sea, but also manufacturers in Europe and Asia offer a high purity Magnesium oxide. Due to our long-term partnership with our producing partners we are a well-known expert for:

Magnesia / Magnesium oxide powders

- Magnesium oxide powder; light & heavy, EP and USP conform, active pharmaceutical ingredient (*required documentation for registration purposes available*)
- Magnesium oxide powder; light & heavy, EP and USP conform, excipient use

MagGran® MO / Magnesium oxide granular

- Magnesium oxide granulated, active pharmaceutical ingredient or excipient use
- Excellent tableting properties

The bulk density of our products ranges from 80-90g/l to 850-1,050g/l
