Mineral compounds for your pharmaceutical ingredients – qualified, audited, certified

MAGNESIA is your experienced specialist for active pharmaceutical ingredients, mineral based ingredients and excipients. We supply high-quality mineral compounds based on magnesium, calcium, potassium, sodium, zinc and other elements complying with the requirements of the relevant pharmacopoeias. Our mineral compounds can be used in a variety of applications and different dosage forms within the pharmaceutical industry. For example in solid forms for peroral applications, semi-solid preparations for dermal applications and liquid forms for

use in e.g. suspension or infusion solution. As a distributor of active ingredients being certified acc. to GDP, IFS Broker, IFS Logistics and DIN EN ISO 9001, we always keep an eye on the legal requirements for the manufacture and registration of pharmaceutical products. In addition, we offer comprehensive service and product advice. Quality management, document management as well as necessary certifications and audits of suppliers and products are an integral part of our service.
